

CHEMICLEAN PRODUCTS

TECHNICAL INFORMATION SHEET

AQUASAN

General Purpose Bactericidal Detergent Powder

AQUASAN is a white free-flowing powder consisting of mild alkalis, sequestrates and organic chlorine bactericides, which has been specifically developed to remove grease, body fats and general soiling from tiled and most other hard surfaces. **AQUASAN** does not foam and therefore can be used to clean the surrounds of swimming pool areas.

Features

Economical

Benefits

Only a small amount of **AQUASAN** is required to clean most hard surfaces.

Versatile

AQUASAN can be applied both manually and by machine application.

Non foaming

AQUASAN does not cause foaming and is therefore suitable for swimming pool surrounds.

Bactericidal

AQUASAN contains an organo chlorine compound which has a broad spectrum of activity against bacteria, moulds and fungi.

Safe to Use

AQUASAN contains no harsh alkalis or solvents to affect tiled or other hard surfaces and will not affect the pH of the swimming pool water.

Directions for Use

Simply dilute **AQUASAN** with cold water. Add 3 scoops of product per 10 litres of water, spray or pour diluted product onto area, agitate with a brush or deck scrubber before rinsing away with clean water.
