TECHNICAL INFORMATION SHEET

COLD TANK DEGREASER

Heavy Duty Degreaser and Carbon Remover

C.T.D. is a powder of chlorinated hydrocarbon solvents and other specialised additives blended together to facilitate the removal of heavy grease, tar, bitumen, carbon, carbonised oil many types of industrial paint coatings

Features

Non - Flammable

Benefits

C.T.D. contains no flammable solvents

Easy to Use A steel soak tank is all that is required to use **C.T.D.** No heat or agitation is necessary to effectively remove grease, oil, carbon etc

Versatile

C.T.D. removes most industrial coatings including tar, bitumen, carbon, paint, heavy oil and grease **C.T.D.** is used to clean Carburettors, Engines, Gearboxes, Heat Exchangers and other machine parts

Economical

Items may be left to soak in **C.T.D.** for any period including overnight. They are then removed and simply rinsed by water, with either hosepipe, pressure washer or in a dip tank of water. The dip tank of **C.T.D.** can be used again and again for maximum economy

Safe

Can be used on both ferrous and non-ferrous metals including Aluminium

Directions for use

Use **C.T.D.** in a mild steel tank with approximately 3" of water seal to minimise evaporation. Immerse work into the tank at normal room temperatures (no heat required) for as long is required to remove contamination, before removing and rinsing off in clean water, with either a hose pipe, pressure washer or in a dip tank of water
