# Introduction

The Specialised Product department at Numatic International has now been in operation for a period of 19 years, during this time we have been able to offer a service to our many customers for “bespoke” products of many different shapes and sizes, that are able to work in a multitude of “specialist environments”. Our focus and dedication has led to a range of products that give outstanding results every time.

This year our catalogue has been changed, each product has been placed into individual categories to make individual selection far easier with detailed information for each product, there is even a list of optional upgrades offered, enabling you to customise each product to suit your individual requirements.

All of our specialised products are now colour coded and this is presented throughout the guide, dry pick up products are coded red. Hazardous products are coded yellow and all wet pick up products are coded blue.

We hope you enjoy our “new look” catalogue and look forward to hearing from you soon.

# CRQ 500-s Clean Room Vacuum

## Description

The CRQ 500-s is the ideal companion for use in a “clean room” environment, the vacuum is powered by a “Twinflo” vacuum motor giving superior performance every time. Filtration is an all too important consideration, something this product is proud to boast.

The power head is equipped with “Twin HEPA” filtration giving before and after motor filter performance, but that’s not all. A primary “Tritex” filter is fitted beneath the head assembly and a “HEPA-FLO” filter bag fitted inside the drum, completes the “four stage” filtration package. With filtration levels of 99.997% we are sure you’ll agree that will take some beating.

The vacuum has a capacity of 20 litres which can be sealed using the supplied end caps, something normally undertaken during transportation. A fully mobile chassis adds the finishing touches while an accessory kit completes the ready for action package.

## Specifications

Power; 1200 watts (max). Airflow; 45 litres/second. Suction; 2600mm.  
Capacity 20 litres. Cleaning range; 26.8 metres. Weight; 15.4Kg.

# Medical 1000-2T Hospital/Allergy Vacuum

## Description

The Medical 1000-2 T is the perfect companion where high level filtration is required and is especially suited for use in a hospital environment, or in areas where dust allergy sufferers have regular contact.

The vacuum is powered by a high performance “Twinflo” direct airflow motor, something all too important when cleaning problem areas. The three stage “filtration” package incorporates a HEPA filter, primary filter and “HEPAFLO” dust bag, the perfect recipe for the removal of dust mites and allergens on a daily basis.

The vacuum is complimented with a high performance “Turbo Electric” accessory kit giving deep down performance every time. Mobility is also important and this is provided by a fully mobile clip on chassis. Cleaning results that really show, makes the Medical 1000-2 T the best choice for hospital environments or allergy sufferers.

## Specifications

Power; 1200 watts (max). Airflow; 45 litres/second. Suction; 2600mm.
