

WV570-2 WVD570-2

When the need is for bigger but still portable commercial wet or drys, the 570 series sets entirely its own standard.

First you have the full Structrafoam construction, in fact a Numatic first, unmatched worldwide. Structrafoam is a material formulation embodying all the strength needed for bigger machines, yet without weight penalty. It is really rugged. It doesn't dent, scratch or deteriorate and yet it is light in weight and resists all standard cleaning chemicals.

Twinflo'

The power and performance are to the full Twinflo' standard with a choice of one or two-motored specifications and both incorporate the Nucable plugged, replaceable cable system as standard.

The accessories provided are equally professional being 38mm (1 1/2") as standard and allowing for full wet or dry operation. The tube sets are stainless steel and a pair of Multiflo' 400mm (16") floor nozzles are included both again manufactured in Structrafoam.

The 570s are a fine example of Structrafoam engineering making sound common sense.

Model	Motor	Power	Airflow	Suction	Dry	Wet	Range	Weight	Size
WV	1200W	230V	40 L/sec	2500mm	23L	15L	26.8m	13.6Kg	415 x 415
WVD	2400W	AC 50/60Hz	80 L/sec	2500mm	23L	15L	26.8m	15.8Kg	x 645mm

Also available 115V/120V specification.
