TwinPac 570

*Two Parts Really
Do Make Carpet
Cleaning Twice
As Good...*

...and twice as easy!

The compact, common sense, high performance professional carpet extraction package. Truly a pair of high powered Structofoam buckets... easy to fill... easy to empty... easy to use and ideal for single operators.

Two buckets are better than one...

The system is split into two parts:- the powered 30-litre solution bucket and the 15-litre twin motored extraction bucket. But being two parts they are easy to handle especially where dirty water must be disposed of in a sink or WC... you simply empty the bucket... and for the clean water you simply fill the bucket as required... never easier!

Part 1

Part 2

A twin 10-metre quick release solution and power cable (the umbilical we call it) joins the two together coupled with our deep clean extraction kit completes this truly versatile package.

Operation is simplicity itself, by virtue of the system being in two parts you position both units in the area to be cleaned, fill the solution tank, it then stays conveniently out of the way, you connect the extraction machine to the solution tank (the umbilical again), attach the kit and you are ready to go. A cleaning range of 26-metres after which you can move the solution unit on its castors and cover another 26-metres. Extraction performance gives you an amazing 90%+ liquid recovery substantially reducing drying time... this really is "Good News"!

During the cleaning cycle the extraction dirty water tank must be emptied once when full but, being so convenient, it takes no time at all. (For a larger extraction machine see information on the TP-930).

Big Machine Performance with Little Machine Convenience.

The TPD-570 System

Part 1	Power	Pressure	Flow	Capacity	Cable	Weight	Size
	230V AC 50/60Hz	58psi/ 4 bar	2L/Min	30L	10.0m	12.5Kg	415 x 415 x 630mm

Part 2	Motor	Power	Airflow	Suction	Capacity	Range	Weight	Dimensions
	2400W	230V AC 50/60Hz	80 L/sec	2500mm	15L	26m	30.9Kg	415 x 415 x 630mm
