TECHNICAL INFORMATION SHEET

SPEEDY

EMULSION POLISH REMOVER

SPEEDY blends non-caustic alkalis, solvents and specialised additives to enable the removal of emulsion polishes without the need for machine scrubbing. **SPEEDY** requires no rinsing when used at the correct dilution

Features

Versatile

Effective

Biodegradable

Water Conditions

Benefits

Can be applied by mop, spray or machine method

Removes the heaviest build-up in a single application.
Suitable for both metallised and non-metallised polishes

Fully biodegradable, presents no effluent problems

Suitable for use in both hard and soft water areas

Directions for use

Normal Stripping: Dilute with 5 parts of warm or cold water. (Heavily built-up polished areas may require dilution with 3 parts water). Mop the solution onto the floor leaving it uniformly wet. Leave for 15 minutes agitating with mop from time to time and avoid drying out by applying more solution if necessary. Remove slurry with wet vacuum or by dry mopping. Allow floor to dry before re-applying new polish

Spray Stripping: Dilute with 20 parts water. Spray a fine mist over the surface and scrub thoroughly using a rotary machine fitted with a stripping pad. Remove any residue using either a wet pick-up machine or by mopping. Finally, damp mop floor and allow to dry before re-applying fresh polish

Machine Stripping: Dilute with 10 parts water. Apply solution to floor and machine scrub using a rotary machine fitted with a stripping pad. Remove any slurry using a wet vacuum machine or mop thoroughly. When surface is dry apply new polish

Specification

Appearance	Clear Liquid	pH as supplied	12.5 - 13.5
Colour	Colourless	S.G.	1.04 – 1.06
Odour	Characteristic	Storage Life	24 months minimum
Biodegradable	Yes	Free Rinsing	Yes

Packaging: 5Litre, 25 Litre, 210 Litre Containers

Health & Safety: Refer to relevant C.O.S.H.H. Data Sheet
